Factors that could affect the Auditor's independence from the Issuer, including information on the existence of substantial interests linking the Auditor (or Auditor's executive employees) to the Issuer (or Issuer's executive employees):

- existence of the Auditor's (or Auditor's executive employees') share of participation in the Issuer's Charter Capital – *none*;
- loans made by the Issuer to the Auditor (or Auditor's executive employees) – *none*.
- existence of close business relations (participation in promotion of the Issuer's products/services, participation in joint entrepreneurship activities, and the like), or existence of family ties – *none*;
- data on Issuer's executive employees who are also the Auditor's executive employees (or the Auditor) – *no such persons*.

Information on steps undertaken by the Issuer and by the Auditor to avoid the effects of such factors:

The major step undertaken by the Issuer to avoid the effects of said factors has been the process of careful evaluation of a potential auditor as concerns his independence from the Issuer. The Auditor is completely independent from the Issuer's executive bodies in compliance with the requirements of Article 8 of Federal Law "On Auditor Activities," and the Auditor's amount of remuneration is not made dependent on the results of the conducted audit.

The Issuer's procedure of Auditor selection: *there is currently no bidding procedure related to Auditor selection.*

Procedure of presenting a potential Auditor for approval by the Meeting of Stockholders / Participants, and the management body making the corresponding decision:

As per Item 5.19.9 of Article 5 of the Issuer's Charter, the competence of the Issuer's General Meeting of Stockholders extends to "approval of the Company's Auditor".

In selecting the Auditor, the Company takes into account: positive referrals on the market of auditor services; skills of specialists; experience of accounting and auditing work at large enterprises and in tax authorities; attestation by the RF Ministry of Finance.

Information on work performed by the Auditor as part of special auditing tasks: *the Auditor has been performing no work as part of special auditing tasks.*

Procedure of determining the size of the Auditor's remuneration: *As per Item 6.3.3.11 of Article 6 of the Issuer's Charter, the size of the Auditor's remuneration will be determined by the Board of Directors. In accordance with the Statute of Audit Committee of the Board of Directors, the Audit Committee will pre-consider the expected size of remuneration and submit its recommendation to the Board of Directors.*

Actual amount of remuneration paid by the Issuer to the Auditor by the outcome of each fiscal year **for which the Auditor audited the Issuer's bookkeeping and financial/accounting reporting:**

Year of 2006 – 318, 420.00 rb

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

II. Core Information on Issuer's Financial / Economic Situation

2.1. Indices of the Issuer's Financial / Economic Performance

<i>Indices</i>	<i>Value Over the Reporting Period</i>
Worth of Issuer's net assets, thousand Rb.	66 102 049
Ratio of total borrowed funds to capital and reserves, %	0,04
Ratio of total short-term liabilities to capital and reserves, %	0,01
Coverage of payments on debt service, %	738,67
Level of debts overdue, %	0
Turnover of accounts receivable, times over	0
Share of dividends in profits, %	0
Labor productivity, Rb/employee	0
Ratio of depreciation to revenue, %	-

The Issuer's financial condition is stable, which is attested to by the significant worth of the worth of the net assets at 66 102 049 thousand Rb on 30/06/2009.. The increase in the net assets value as of 30/06/2009 was due to the net profit earned in the reporting period because of the income from revaluation of cash assets in foreign currency and of the income from placing available cash assets on deposit accounts and in trust management, and dividends accepted from the CJSC Polyus.

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

The ratio of the sum total of borrowed money to total capital and reserves, and the ratio of short-term liabilities to the total capital and reserves serve as indices of financial dependence. When these indices equal zero, the Company's financial dependence is at the minimum.

The ratio of the sum total of borrowed money to total capital and reserves was 0.01% for Quarter II of 2009, which attests to the Issuer's low level of financial dependence.

On 30/06/2009, the ratio of short-term liabilities to the sum total of capital and reserves was at 0.01%, which likewise suggests a conclusion of the Issuer's low financial dependence.

Over the six months of 2009, the index of coverage of payments on debt servicing had a significant value of 738,67, which was due to the relatively small amount of accounts payable in the reporting period against the background of ample net profits.

As of 30/06/2009, the Issuer had no overdue unpaid debts.

The turnover of accounts receivable over Quarter II of 2009 equaled zero as the total revenue over these periods equaled zero.

As of 30/06/2009, dividends for 2008 were not accrued.

In this context, labor productivity is an index showing the volume of rendered services per one employee. Over Quarter II of 2009 this index was Rb. 0 thousand/employee, as the sum total of revenue over this period equaled zero.

The index of the ratio of depreciation to the amount of revenue by the end of Quarter II of 2009 was not determined as the revenue index equaled zero.

2.2. Issuer's Market Capitalization

<i>Index</i>	<i>Market Capitalization Value as of June 30, 2009</i>
Issuer's market capitalization, Rb.	233 865 932 574,54 Rb.

The method of determining the value of Issuer's market capitalization:

The value of market capitalization of the OJSC Polyus Gold as of 30/06/2009 was determined by the method laid down in the Regulations on Disclosure of Information by Issuers of Securities, approved by the Order of Federal Service for Financial Markets of Russia of October 10, 2006, No. 06-117/pz-n, as a product of the quantity of the Company's placed shares of stock by the market worth of one share of stock of the OJSC Polyus Gold as published by ZAO FB MMVB by the results of trade on 30/06/2009, calculated as per Procedure of Calculation of Market Worth of Issued Securities and Investment Shares of Shared Investment Funds accepted for circulation by trade managers, approved by the Resolution of the Federal Commission for the Securities Market of Russia of December 24, 2003, No. 03-52/ps.

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

Market capitalization of the OJSC Polyus Gold as of March 31, 2009, was 291 717 641 234,10 Rb.

Market capitalization of the OJSC Polyus Gold as of December 31, 2008, was 144,960,963,928,68 Rb

2.3.4. Issuer's Other Liabilities

The Issuer had no other liabilities not reflected on his balance sheet.

2.4. Objectives of Emissions and Allocation of Assets Yielded by Placement of Issued Securities

No securities have been issued in 2008 and in Quarter II of 2009.

2.5. Risks Involved in Acquisition of Issued Securities Already Placed / Being Placed

2.5.1. Sector-Related Risks

Activities related to prospecting for and production of natural resources are associated with specific risks beyond the Issuer's control, such as: geological, geological-technical and seismic factors, accidents or emergencies at the production facilities, adverse weather conditions, equipment breakdown, unscheduled process shutdowns, technology failures, undesired environmental effects.

The most prominent risks:

- *Falling gold price. Significant sinking of the gold price might affect adversely the Issuer's financial standing. The gold market is characterized by cyclic trends and is vulnerable to general changes in the economy, with the gold price being dependent on diverse factors including the supply and demand ratio on the market, the global scope of availability and utilization of production capacities, the geopolitical situation, currency rates of exchange, and trade constraints. To minimize the risks, steps are undertaken to cut down production costs, conclude long-term agreements for product sales, and look for new cost-effective production technologies and their introduction.*
- *Prospecting for natural resources is associated with a high risk level. Any data on ore reserves are of the estimation nature, with no full assurance of their extraction or use in production in the planned volumes. There is a potential for the estimates being revised, e.g. when the expedience of working with lower-quality ore is questioned on account of the sinking metal prices or of the underlying geological data not having been confirmed.*

To minimize this risk, any application for acquisition of licenses or acquisition of a new facility is preceded by thorough expert examination of the investment attractiveness of a project and its

sensitivity to project data changes, with full use made both of the experience and knowledge of own specialists, geologists and mining engineers, and engagement of independent experts – the sector’s high professionals. Furthermore, there are the options of acquisition of fields in various regions of Russia with their diverse mining and geological environment, so that the risks being discussed become diversified.

- *Worsening of the mining and geological situation on account of the declining gold content in the ores being handled, and the growing share of “hard” ores.*

This risk can be mitigated by conducting advance production-oriented geological survey, and implementing measures of improving the ore extraction and processing technology.

- *Risk of growing operation and capital costs due to the growth of prices of fuel, energy, spares, vehicle fuels and lubricants (VFL) and other materials used in the production technologies, of strengthening of the national currency, and also risks of under-deliveries of the materials required (with no possibility of purchasing additional volumes or the suppliers lacking the required material kind).*

This risk is partly compensated for by continuous monitoring of the warehouse stock, by measures aimed at reduction of production costs, by transition to alternative cost-saving materials usable in the production technologies. This risk could also be partly compensated for by running down prices in the biddings for purchases of the materials in question.

As concerns the steps undertaken to minimize the risks of diverse kinds and levels, also worth mentioning would be:

- *Stocking up reserves and supplies: financial, material, and others, to provide for prompt responses for financial or operational damage (e.g. caused by theft, losses due to natural disasters, and the like);*
- *Securing insurance of the property and personnel, against risks involved in financial operations, and other kinds of insurance;*
- *Enhancing the information maintenance system (keeping up a continuously updated business information environment).*

2.5.2. Country- and Region-Associated Risks

The Company has been registered as a taxpayer exclusively in Russia and does not engage in activities in other countries. Hence, the following risks must be accounted for:

- *Potential instability of the political situation: international conflicts, military conflicts, terrorism, introduction of the state of emergency, nationalization, strikes. The last three years in Russia have been marked by political stabilization that has built up a favorable climate for investment into domestic industries and somewhat mitigated the political risks associated with this country. Concurrently, though, since 2001 country-associated risks have been on the rise in several other countries, related to a series of crisis phenomena in the global economy and*

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

sharp worsening of the international situation. The effect of these risks on the Issuer's activities is medium.

- *Instability of the economic situation in Russia. The gross domestic product has been steadily growing, the rate of inflation has declined, and the national currency is stable relative to the US dollar. However, the strengthening of ruble relative to dollar taking place recently makes Russian goods less competitive with imports, and the country's economy is still dependent on the global oil and gas prices. Neither is there any assuredness that the positive rates of growth of Russia's economy would keep up in the future.*

2.5.3. Financial Risks

(a) The OJSC Polyus Gold is going to have financial management actions accompanying its production activities, aimed at efficient management of the Company's property and sources of financing. The Issuer has in his plans borrowing money as part of his financial and economic policy. Hence, the Issuer becomes susceptible to the risk of changing interest rates on its existing obligations/liabilities.

Projected actions of the OJSC Polyus Gold in the event of a negative effect of changing interest rates on the Issuer's performance:

- *Securing long-term credits and loans to avoid negative effects of short-term interest rate fluctuations;*
- *Decreasing the proportion of credits and loans in the floating assets of the Issuer's affiliated companies.*

(b) Fluctuations of the rates of exchange of foreign currencies might give rise to the following risks: transaction risks (risks of negative variation of the working capital and/or of interest payments); translation risks (risks of negative variation of the bookkeeping figures in currency conversion).

It should be pointed out that the effect of the market trends of the external gold markets could be deemed substantial. The translation risk has been gradually losing its prominence given the policy of the RF Central Bank in stabilizing the rate of exchange of the domestic currency.

To minimize the currency-related risks in the future, the Issuer has in his plans to secure predominantly Ruble credits.

(c) Negative effects of inflation on the Issuer's financial and economic performance can be confined to the following risks:

- *Risk of decreasing real value of the assets available for going through with the investment program,*
- *Risk of growing interest payable;*
- *Risk of growing prime costs of goods, work and services due to indexation of tariffs on fuel, bought electric power, wages, etc.*

As seen by the Issuer, the rate of inflation that would actually encumber the Company in its business activities is at least 100%.

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

It should be pointed out, however, that, with inflation advancing, the gold price would grow, so the risks of the OJSC Polyus Gold related to inflation, though out of its control, can be deemed low.

The financial index most susceptible to risks associated with the interest rate variation is the Company's profit. With the interest rates growing, interest payments for the use of credits would increase, and the Company's profit would decrease accordingly.

2.5.4. Legal Risks

Legal risks associated with changes in currency regulation.

Notwithstanding the fact that legislation acts have been passed in the Russian Federation governing the issues of currency regulation, there is still a risk that, in order to eliminate the aftereffects of or to preclude economic crises in the country, the RF Government might resort to administrative measures of economy control. This, if it happens, could give rise to a risk of introduction of restrictions on transfer or export of foreign currencies, a risk of stepping up the regulatory ratio of sale of currency revenues, and other similar risks. With these risks taking place, the activities of the OJSC Polyus Gold would be affected adversely, as this could complicate the settlement of accounts with the foreign counterparts.

Legal risks associated with changes in the tax laws.

Tax laws have been changing in the entire territory of Russia beginning 01/01/2002 when the profit tax rate was altered to twenty four (24) percent (*before January 1, 2002, the maximum rate was 35%; tax on the profit from intermediary operations and transactions and on the profit of insurance companies, exchanges, brokerage houses and banks could be levied at the maximum rate of 43%), and profit tax benefits were cancelled. Further changes influenced the amount of the profit tax paid by the companies to the federal budget and to the budgets of the constituent entities of the Russian Federation. From January 01, 2009 on, profit tax makes 24 (twenty four) percent.*

The RF Government was going to implement a tax reform in the coming three years, gradually reducing the tax burden at a rate of about one (1) percent of the GDP a year. Since 2004, the VAT rate has been reduced from twenty (20) to eighteen (18) percent, with a beneficial rate of ten (10) percent retained for certain goods. Alterations of the tax laws, same as a potential for ambiguous interpretation of individual legislative acts bring about a certain level of risk for the Issuer despite his actions of adherence to the tax laws in every respect.

Legal risks associated with changes in the customs regulations and duties.

A risk of changing procedures of customs control and duties is not significant for the OJSC Polyus Gold. Over the recent years the procedures of customs control and customs duties have not undergone any serious changes.

Legal risks associated with changes of requirements to licensing of the Issuer's main line of activities or licensing of the right of using the objects whose availability in turnover is limited (including natural resources).

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

Given a potential for amendments being passed in the laws of the Russian Federation as to restriction of participation of foreign investors, including companies whose composition of stockholders/participants includes foreign entities, in competitions and biddings for the use of natural resources, and also restrictions of foreign participation in the strategic sectors, there is a possibility of the Issuer becoming restrained in acquisition of new licenses for use of natural resources, as well as of new assets and companies engaged in the use of mineral resources.

Legal risks associated with changes in court procedures on issues related to the Issuer's activities (the licensing issues included) that could affect negatively his performance, and also the outcome of the current court hearings involving the Issuer.

Legal risks associated with changes in court procedures on issues related to the activities of the OJSC Polyus Gold are at present insignificant.

2.5.5. Risks Associated With Issuer's Activities

There are currently no court hearings involving the Issuer or capable of affecting significantly his activities.

The OJSC Polyus Gold is subject to no risks related to being incapable of extending the term of licenses, as the OJSC Polyus Gold has no licenses.

Risks related to potential liability of the OJSC Polyus Gold for debts of third parties including its affiliated companies are deemed insignificant.

Risks related to potential loss of consumers whose turnover claims at least 10% of the total revenue from sales of products of the OJSC Polyus Gold are none, as on the date of the drafting of this Report the OJSC Polyus Gold had no such consumers.

2.5.6. Banking Risks

The Issuer is not a credit institution. Clause 2.5.6 does not apply to the Issuer.

Grounds for issue of License: *joint Resolution of the Administration of Krasnoyarsk Krai of 08/02/2000, No. 16-n, and KPR for Krasnoyarsk Krai, No. 20/15-H of February 17, 2000.*

This mineral reserve section has the status of: *mining allotment within provisional confines, to 1000 m ore mineralization depth.*

Description of the mineral reserve section allotted for use: *licensed area is located in 30-75 km to south of Severo-Yeniseisky workers settlement of Krasnoyarsk Krai of RF. Area – 1340 sq.km, including the area of the Olenye deposit of 1.0 sq.km.*

License kind: *geological exploration and mining of ore gold in the Olympiadinskoye area.*

Main provisions of the License as to obligations, with the term of meeting these obligations specified:

- *No later than by May 24, 2005, to have completed the first phase of geological exploration of the Licensed area – survey and assessment of identified promising sections, with the estimated resources and gold reserves data submitted for State expert examination of mineral reserves;*
- *No later than by October 1, 2005, to have drafted and coordinated in the established procedure a project of survey and assessment work of the second phase;*
- *No later than by January 1, 2007, to have drafted and coordinated a technical project of development of the Olenye gold ore deposit;*
- *No later than by June 1, 2008, to commence construction of infrastructure facilities of a mining facility at the Olenye deposit;*
- *No later than by December 31, 2009, to have attained the design capacity (as per the technical project) of the mining facility at the Olenye deposit;*
- *To have drafted and coordinated in the established procedure projects of liquidation of the mining facilities not later than 6 months in advance of the set date of completion of work on the deposits.*

Obligatory payments to be made under the License terms: *the rates of taxes and payments for mineral wealth usage have been set as per the tax laws and mineral wealth usage legislation of the Russian Federation.*

Meeting of the obligations:

- *As part of the first phase of geological exploration of the Olympiadinskoye area, survey work has been completed at 7 sections, and survey and assessment work, at 2 ore occurrences (Olenye and Blagodatnoye). At two survey sections (Talovskoye and Kirkilovskoye), gold ore mineralization has been identified, and survey and assessment work has been recommended. Five survey sections have been deemed lacking promise. As a result of the survey and assessment work, ore gold reserves have been approved for Olenye deposit – TKZ of Krasnoyarsk Krai, Minutes of 20/04/2004, No. 594. Extraction work is underway.*
- *All payments are made on time as per the tax laws and mineral wealth usage legislation of the RF.*
- *The field is being finalized before the due date.*

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

(b) Processing of minerals: is conducted by the CJSC Polyus only at the Olympiadinskoye deposit and is performed by ZIF-1 (Gold Extraction Mill-1), ZIF-2 and by ZIF-3; with refining conducted at the OJSC Krastsvetmet.

Data on the processing cost over the last reporting period are not available to the Issuer.

(c) Sale of products: the CJSC Polyus sells refined noble metals (gold and silver) produced by the processing of the extracted minerals on the domestic market.

In compliance with Item 5, Art. 2 of the Federal Law “On Noble Metals and Precious Stones,” No. 41-FZ, refined noble metals when sold by the subjects of their extraction and production will be offered in the priority order to the specifically authorized Federal executive authority for replenishment of the State Fund of Noble Metals and Precious Stones of the Russian Federation. The State's priority right of purchase of noble metals will apply when the conditions specified in the Law are met (prepayment for deliveries, concluding agreements in advance).

The fact that the CJSC Polyus has no obligations to deliver noble metals to the State Fund of Russia in 2008 is confirmed by Letter of Gokhran of Russia of 28/11/07, No. 32-10-104-188/3166.

Sales of noble metals on the domestic market are carried out under delivery contracts and general agreements with commercial banks.

3.2.9. Additional Requirements to Issuers Whose Main Line of Activities is Rendering Communication Services

The Issuer is not rendering communication services.

3.3. Issuer's Plans for Future Activities

The Issuer's strategy envisages evolution of the currently active gold mining facilities and implementation of new projects of development of deposits under licenses owned by the affiliated and dependent companies. Proceeding from this strategy, the Issuer intends to join the five global leading gold mining companies by 2012 – 2015 by the production volume, reserves and market capitalization. In execution of these set strategic objectives, it is foreseen that the affiliated and dependent companies will proceed with the following investment and production programs:

- Financing of large-scale geological exploration activities on the licensed areas of the affiliated and dependent companies;*
- Stepping up the efficiency of mining operations and gold production at gold extraction plants of the affiliated companies, including implementation of a cost-cutting program assuring introduction of innovative programs and stepping up labor productivity;*
- Construction of new production facilities at gold ore deposits.*

The Issuer is further going to look for new targets for acquisition, including acquisition of mineral wealth usage rights at auction sales, and also acquisition of new gold mining facilities.

IV. Data on Issuer's Financial and Economic Performance

4.1. Results of Issuer's Financial and Economic Activities

4.1.1. Profits & Losses

<i>Indices</i>	<i>As of 30/06/2009</i>
<i>Revenue, thousand rubles</i>	<i>0</i>
<i>Gross profit, thousand rubles</i>	<i>0</i>
<i>Net profit (undistributed profits (uncovered losses)), thousand rubles</i>	<i>1 610 292</i>
<i>Return on equity, %</i>	<i>2,44</i>
<i>Return on assets, %</i>	<i>2,44</i>
<i>Net profitability factor, %</i>	<i>-</i>
<i>Profitability of products (sales), %</i>	<i>-</i>
<i>Capital turnover</i>	<i>0</i>
<i>Sum total on uncovered losses on reporting date, thousand rubles</i>	<i>0</i>
<i>Ratio of uncovered losses on reporting date to balance sheet total</i>	<i>0</i>

There were no revenues nor gross profit in Quarter II of 2009, as the Issuer was conducting no business activities. The net profit by the results of the six months of 2009 was due to the income from revaluation of cash assets in foreign currency and to the income from placing available cash assets on deposit accounts and in trust management and dividends obtained by CJSC Polyus. Net profit for the six months of 2009 amounted to 1 610 292 thousand rubles This index represents the increment of the Issuer's equity.

Return on equity in the six months of, 2009 was 2.44. This level of equity profitability in Quarter II of 2009 should be held normal for the Issuer.

The return on assets in the six months of 2009 was 2.44%, which represents the effectiveness of the Issuer's side line of activities: placement of free monetary assets. The net profitability factor represents the ratio of a company's net profit to its revenue and is an important index in the system of evaluation of a company's efficacy of operations. The Issuer's net profitability factor over Quarter II of 2009 was not calculated, as its revenue over this period equaled zero.

The factor of profitability of products / sales characterizes the core activities and is calculated as a ratio of the profit from sales to the revenue. This is a major index displaying the efficacy of sales.

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

The Issuer's sales profitability factor over the reporting period was not calculated, as his revenue over this period equaled zero.

The capital turnover factor represents the number of the capital turnovers over a period under analysis. The Issuer's value of this factor over Quarter II of 2009 was 0, as its revenue over this period equaled zero.

The Issuer had no uncovered loss on 30/06/2009.

4.1.2. Factors Affecting Variation of Size of the Issuer's Revenues from Sales of Goods, Products, Work, Services, and of Issuer's Profits / Losses from Core Activities

In Quarter II of 2009, the Issuer was not engaged in core business activities or in the sale of goods, work or services.

4.2. Issuer's Liquidity, Adequacy of Capital and Circulating Assets

<i>Indices</i>	<i>As of 30/06/2009</i>
Own floating assets, thousand rubles	7 033 972
Permanent capital asset index	0,89
Current liquidity factor	1 166,96
Fast liquidity factor	1 158,57
Own assets autonomy factor	1,00

The Issuer followed the recommended attitude.

The existence of own capital in turnover (of own floating assets) is among the most important indices of the entity's financial stability. With no own capital in the entity's turnover, this would mean that all floating assets and, possibly, some non-current assets have been formed by borrowing. By the end of Quarter II of 2009, the Company's own floating assets were 7 033 972 thousand rubles, which meant that the Company could potentially cover its current debts from its own floating assets. The index of permanent capital represents the ratio of the sum total of assigned assets of low liquidity to the equity capital. The Issuer's index of permanent capital matched the recommended value and amounted to 0.89 in Quarter II of 2009, which means that that 89 rubles out of every 100 rubles of the own assets were used to form non-circulating assets.

Current liquidity ratio is used for general assessment of the organization's current liquidity and shows adequacy of the circulating assets which may be used to repay current liabilities. Current liquidity ratio of the Issuer as of 30/06/2009 is adequate and makes 1 166,96, meaning that the current debt is covered by cash assets and by the future revenues from day-to-day operations, and that safety factors are in place.

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

The fast liquidity factor represents the company's projected solvency (the share of repayment of short-term current liabilities) in the event that a critical situation arises. The Issuer's fast liquidity factor was 1 158,57 on 30/06/2009, which was much higher than the optimum value (0.8 – 1.0).

The equity capital autonomy factor gives an idea of the Issuer's financial independence from sources of borrowing. At the end of Quarter II of 2009 the value of this index was 1.00, which proved the Issuer's financial independence from the sources of borrowing.

4.3.3. Issuer's Intangible Assets

Issuer has no intangible assets.

4.4. Data on the Issuer's Policy and Expenses in Scientific and Technical Development Domain, As Concerns Licenses and Patents, New Developments and Research

The Issuer incurred no expenses on scientific and technical activities from his own money. The Issuer owns no intellectual property requiring legal protection.

4.5. Analysis of Evolution Trends in Issuer's Core Activities Domain

According to GFMS, the global gold output in 2008 was 2,385 tons, dropping by almost 4% against 2007. Reduced gold output is observed for the third year at a run, and the 2008 figure is the lowest one since 1995.

For the second year at a run, China remains the leading gold-mining country of the world which increased its gold output by 3% - from 280 tons in 2007 to 288 tons in 2008. The four leaders also include SAR, Australia, and the USA.

China and Russia became the regions showing the highest growth rate in gold production. Australia, Indonesia and South Africa showed the most significant slowdown in gold mining.

According to GFMS, in 2008 Russia became one of the five leading countries by its gold output, leaving behind Peru which held the last place among the five leading countries in 2007. In 2008, Russia increased its output by 8% - from 169 tons in 2007 to 183 tons in 2008, having demonstrated the highest growth among the five leading countries in 2008. The major contribution to the gold production increase in Russia was made by Kinross Gold, which launched in May 2008 its production on Kupol field on Chukchi Peninsula. In 2008, Kupol's production amounted to 12.6 tons (405 thousand ounces) of gold.

Among the countries with positive gold production trend observed in 2008, China, Peru, Mexico, Papua New Guinea, Ghana and some other countries should be mentioned in addition to Russia. Reduction in gold output has been observed in Indonesia (-37% of the output in 2007), SAR, Australia, Canada, USA, and in more than 30 other countries of the world.

Last year, gold prices continued growing. In the period from January 01 to December 31, 2008, the gold price range was between US\$713 and US\$1,011 per ounce. The average price in the same period was US\$872 per ounce.

In the period from January to March, 2008, the price gradually increased from the level of US\$834 and reached the maximum of US\$1,011 per ounce in mid-March, which became the absolute historically observed all-time nominal level. This peak increase in gold price concurred with significant weakening of American dollar and with the sharply increased oil price on the global markets.

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

The second peak in gold price increase occurred in mid-July when the price reached US\$986, after which it decreased to the minimum mid-September level of US\$741 per ounce following reduction of oil prices and strengthening of the American dollar.

From mid-September to early October, the price went up again and reached the third peak in the year with the maximum of US\$905, following which the price went down and in the end of October reached the absolute observed in 2008 minimum of US\$713. From October 2008, the gold price decreased concurrently with reducing oil prices and growing US dollar exchange rate on the global financial markets. From early December, adjustment of gold price was observed; and as of December 31, 2008, the spot price was US\$865.

2008 showed overall growth of gold output in Russia. According to preliminary data of the Gold Industrialists Association, output in Russia by the year results will make at least 166 tons.

According to the preliminary results for 2008, the major Russian gold-mining companies show the average output growth by more than 20% against 2007.

4.5.1. Analysis of Factors and Conditions Affecting the Issuer's Performance

In the Company's opinion, the key factors determining the gold price in 2009 will be weak financial and commodity markets, liquidity crisis, unstable global banking system and exchange rate fluctuations, reducing global output of gold, depleting gold reserves, investment demand, and growing geopolitical tension.

Supply and Demand.

Additionally to the extracted metal, finished bar gold stock turnover significantly influences the balance of supply and demand. Significant volumes of gold are stored by the Central Banks and by other financial institutions, industrial organizations and individuals as gold reserves, and sale of gold from such reserves leads to increase in the overall volume of gold supply. Excess supply risk is regulated by the Central Banks Gold Agreement the latest version of which was signed by the European Central Bank and by 16 other Central Banks in 2004. The Agreement establishes limits on sale of gold by the Central Banks for the period of five years. In addition to supply of gold by the Central Banks, a significant portion of the overall gold supply consists of scrap gold.

In 2008, supply reduced by 4% - down to 3,772 tons compared with 3,935 tons in 2007. Sales by gold manufacturers dropped by 4% - down to 2,385 tons against 2,473 tons in 2007. Inflow of scrap gold went up by 13% and amounted to 1,108 tons. Sale from the state funds' reserves dropped by 43% compared to the previous year and made 279 tons. This reduction is a result of reduced supplies by the Central Banks which signed the Gold Agreement.

Demand for gold is mostly created by the jewelry manufacturers and by some industrial sectors such as electronics. Besides, purchase by the manufacturers of their own hedged metal in response to the growing gold price also creates additional demand. According to GFMS, hedging in 2008 amounted to 346 tons.

Nevertheless, global demand for gold in 2008 dropped by 4%. The main reason of recession in demand for gold consisted in reduction of its consumption by the jewelry industry by more than 11% compared to the previous year.

Investment Demand for Gold.

2008 showed high investment demand for gold. According to GFMS, investment demand was represented by demand for gold bars, by the "implied net investments", and by demand for gold coins, and amounted to 795 tons of the metal compared to 553 tons in 2007.

According to GFMS, purchase of gold bars in 2008 went up by 62.3% - from 236 tons to 383 tons of gold. Observed in 2008 was increase of the "implied net investments" in gold by 21.7% - from 180 tons to 219 tons of the metal, and growth in demand for gold coins made 41.6% - from 137 tons to 194 tons.

Growth of investments in gold is first and foremost connected with instability of the global financial market. Traditionally, demand for gold bars was in the Asian countries. Demand for coins in 2008 was at the highest level in the last 21 years and was mostly expressed by investors from North America and Western Europe.

4.5.2. The Issuer's Competitors

The Issuer has no competitors as far as the sale of his product is concerned, as gold is a commodity of utmost standardization and virtually unlimited liquidity.

Major competition among the gold mining companies occurs at the stage of acquisition of licenses for the right of use of deposits at biddings and auction sales. The main competitors are the large gold mining companies (Polymetal and Severstal' resurs, and also Russian companies with foreign capital - Peter Hambro Mining, High Land Gold, High River Gold, and others). The qualitative and quantitative characteristics of the deposits are the main factors influencing the product prime cost.

The Issuer's competitive advantages and investment attractiveness factors are:

- high professionalism of the Issuer's Board of Directors and Management in the mining sector: The OJSC Polyus Gold Management includes the leading professionals on the Russian market with ample experience in successful implementation of projects in the gold mining domain;***
- use of the state-of-the-art technologies, both domestic and foreign, in mining, mineral dressing, modular design and construction;***
- adherence to the intrinsic own methods of assessment of the competitive value of deposits of minerals, gold specifically.***

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

Polyus Gold (travel, accommodation, meals, translation services) in the amount of up to 2 million rubles per year each.

5.4. Data on the Structure and Competence of the Bodies Overseeing the Issuer's Financial and Business Performance

The body overseeing the Issuer's financial and business performance is the Audit Committee as per Article 8 of the Issuer's Charter.

Its structure, procedures and competence are defined in Section 8 of the Issuer's Charter:

"The Meeting will elect the Audit Committee of five (5) persons. Its procedures will be defined by the Statute of the Audit Committee to be approved by the Meeting.

Members of the Audit Committee may not serve at the same time as Members of the Board of Directors or occupy other posts in the Company's executive bodies.

The checks will be conducted by the Audit Committee by the outcome of the Company's activities over a year, and also at any time on an initiative of the Audit Committee, by a decision of the Meeting or of the Board of Directors, and also on request of stockholders jointly owning at least ten (10) percent of the Company's voting shares of stock.

On the Audit Committee's demand, persons holding posts in the Company's executive bodies will be obliged to furnish documents on the Company's financial and business performance".

The Issuer has further established a Committee for Audit under the Board of Directors, and the Control and Auditing Service.

The Issuer's Committee for Audit under the Board of Directors will assess the work of the Auditor and the efficiency of performance of the Issuer's internal control system.

The body responsible for internal control over the Issuer's financial and business performance is the Control and Auditing Service whose functions will embrace direct evaluation of the adequacy, sufficiency and efficiency of the internal control system, and also the overseeing of adherence to the Issuer's internal control procedures.

To attain these objectives, the Control and Auditing Service will perform the following actions of overseeing the adherence to the procedures of internal control:

- *Arranging for and conducting checks and office investigations of the main lines of financial and business activities of the Issuer, also by involving employees of the Issuer's other structural divisions;*
- *Analyzing and summarizing the results of checks and office investigations (including those conducted by the Issuer's other structural divisions) of the main lines of financial and business activities of the Issuer;*
- *Coordinating the efforts of the Company's structural divisions in undertaking internal control steps;*

Quarterly Report of OJSC Polyus Gold for Quarter II of 2009

- *Keeping records of violations identified by internal control, and furnishing information on such violations to the Committee for Audit under the Company's Board of Directors and to the Company's executive bodies;*
- *Monitoring the elimination of violations identified by the checks and office investigations;*
- *Analyzing the results of the Issuer's auditing work and monitoring the working out and execution of action plans of elimination of violations identified in the course of auditing;*
- *Coming up with proposals on enhancing the procedures of internal control;*
- *Drafting documents regulating the activities of the Control and Auditing Service.*

The Control and Auditing Service will annually submit a report on the results of its work over the year to the Committee for Audit under the Board of Directors, and to the Issuer's sole executive body.

In overseeing the adherence to the internal control procedures, the Control and Auditing Service will cooperate with the Issuer's managerial bodies and structural divisions, obtaining from them in the established procedure the explanations, information and documentation the Service requires for performing its functions.

The structure, activities and competence of the Control and Auditing Service are defined in the Statute of Internal Control over Financial and Business Performance of the OJSC Polyus Gold as approved by Decision of the Issuer's Board of Directors (Minutes No.1-pr/CD of 30/03/2006).

The Issuer's Control and Auditing Service is headed by Kuzmin Vladimir Aleksandrovich, Head of Control and Auditing Service.

The Statute of Insider Information of the OJSC Polyus Gold is an internal document setting up the rules of preventing improper use of the office (insider) information, approved by Decision of the Issuer's Board of Directors (Minutes No.1-pr/CD of 30/03/2006). 8.8. Description of Procedure of Taxation of Revenues from the Issuer’s Securities Placed or Being Placed

Taxation of revenues of physicals persons (either tax residents of the Russian Federation or non-residents accruing revenues from sources in the Russian Federation).

In compliance with Art.208 of the RF Tax Code, dividends and interest obtained from the Russia's entity, and revenues from sale in RF of the Issuer's securities are revenues subject to collection of taxes on revenues of physical persons.

When the source of a revenue in the form of a dividend is the Russia's entity, this entity will be held a tax agent and will determine the tax amount separately for each taxpayer on each payment of said revenues at a rate of 9% (Par. 4, Art. 224 of Tax Code of RF) in the procedure laid out in Art. 275 of the RF Tax Code. This rate of 9% is set for physical persons – residents of the Russian Federation.

The amount of the tax due will be calculated proceeding from the total tax amount and the share of each taxpayer in the sum total of the dividends. The total tax amount will be determined as a product of the tax rate by the difference between the sum total of the dividends to be distributed among the stockholders / participants in the current tax period, minus the sum total of the dividends to be paid by the tax agent to a foreign entity and/or physical person – non-resident of RF in the current tax period, and the sum total of dividends obtained by the tax agent himself in the current reporting (tax) period.

When the Russia's entity – the tax agent pays dividends to a physical person – non-resident of RF, applied to these payments as per Item 3 of Art. 224 of the RF Tax Code will be the tax rate of 15%. or other rates when they are provided by the double taxation agreement between the RF and the state where an individual is a non-resident person.

In compliance with Art.214.1 of the RF Tax Code, the taxable base in each transaction with securities and transaction with financial instruments of futures contracts where the basic asset is securities (futures and options stock exchange deals) will be determined individually. In this, revenues from the following transactions will be accounted for:

- *purchase/sale of securities in circulation on a managed securities market;*
- *purchase/sale of securities not in circulation on a managed securities market;*
- *involving financial instruments of futures contracts where securities are the basic asset or stock indices calculated by the securities market makers;*
- *redemption of investment shares of shared investment funds;*
- *involving securities and financial instruments of futures contracts where the basic asset is securities, or stock indices calculated by the securities market makers executed by a trustee (to the exclusion of the management company exercising trust management of the property constituting the mutual investment fund) to the benefit of the owner of the trust (beneficiary), who is a physical person.*

In compliance with Item 3, Art. 214.1 of the RF Tax Code, the taxable base – the revenue/loss from securities purchase/sale transactions will be determined as the sum total of revenues from the totality of transactions with securities of the respective category executed over the tax period, minus the sum total of losses. The revenue/loss will be determined as the difference between the amounts of profits obtained from sale of the securities and the documented expenses on acquisition, sale and storage of the securities, actually incurred by the taxpayer (including the costs compensated to the professional

securities market maker, the management company exercising trust management of the property constituting the mutual investment fund).

The revenue from a transaction of purchase/sale of securities in circulation on the managed securities market will be reduced (increased) by the sum total of the interest payable for the use of monetary assets borrowed for securities dealing, though within the amounts calculated proceeding from the effective refinancing rate of the Central Bank of the Russian Federation. The amount of loss on such a transaction will be determined accounting for the threshold of fluctuation of the market price of the securities. In this, held as securities in circulation on the managed securities market will be securities permitted for circulation at trade managers in possession of a License from the Federal authority responsible for regulation of the securities market.

When expenses cannot be directly attributed to expenses on acquisition, sale and keeping of specific securities, these expenses will be broken down in proportion to the worth evaluation of the securities to which these expenses are related. The estimated value of securities shall be determined as of the date of such expenses.

In determining the taxable base of operations of purchase/sale of securities, it should be remembered that a loss from operations with securities in circulation on a managed securities market would reduce the taxable base of operations of purchase/sale of securities of the given category.

A revenue from operations of purchase/sale of securities not in circulation on a managed securities market which at the time of their acquisition met the requirements set up for securities in circulation on a managed securities market can be reduced by the amount of loss suffered in operations of purchase/sale of securities in circulation on a managed securities market.

The taxable base of operations with financial instruments of futures contracts will be determined as the difference between positive and negative results of reassessment of obligations and rights of claims/receivables under the entered contracts and execution of the financial instruments of the futures contracts, also accounting for the fees for services of stock exchange intermediaries and of the stock exchange in opening and keeping the account of a physical person. In this, the taxable base will be increased by the sum total of premiums received from transactions with options and reduced by the sum total of premiums paid in these transactions.

In determining the taxable base of operations with securities executed by a trustee, the taxpayer's expenses will also include the amounts paid to the trustee as his remuneration and reimbursement for his expenses on the operations with the securities in question.

When the performance of a trustee covers transactions with securities of different categories, and also when other kinds of revenues occur (dividends, interest), the taxable base will be determined separately for each securities category and each kind of revenue. Expenses that would not be attributed directly to the reduced revenues from transactions with securities of a given category or to the reduction of a given kind of revenue will be broken down in proportion to the share of each kind of revenue (income from dealing in securities of the relevant class).

The taxable base of operations of purchase/sale of securities and operations with financial instruments of futures contracts will be determined at the end of the tax period, i.e., the calendar

year. In this, the calculation and payment of the tax amount will be done by the tax agent either by the end of the tax period or when he pays money to the taxpayer before the end of the current tax period. In the last-mentioned case, the tax shall be paid on the share of the revenue corresponding to the actual amount of the money paid. When payments are effected more than once during a tax period, the calculation of the amount of the tax due will be done on an accrual basis accounting for the amounts of the tax already paid.

As concerns operations with securities performed by a trustee, the latter will be held the tax agent. The taxable base of such operations will be determined either on the ending date of the tax period or at the time of the payment of money before the end of the tax period. In this case the tax will be payable within one month from the ending date of the tax period or from the date of payment of the money (transfer of securities). When payments are made from money in trust management before expiration of the terms of the trust management agreement or before the end of the tax period, the tax will be payable from the share of the revenue corresponding to the actual sum total of the money paid to the originator of trust management.

When it is not possible to deduct from the taxpayer the calculated tax by the revenue payment source, the tax agent shall, within one month from the time of occurrence of this situation, notify in writing the tax authority at the place of his registration of the impossibility of deduction and the amount of the taxpayer's debt. In this case the tax will be payable by equal shares in two payments: the first payment, not later than within 30 calendar days from the date of delivery of the tax payment notice from the tax authority, and the second payment, not later than within 30 days after the first payment due date.

The procedure of calculation of the tax on operations with securities is laid down in Article 224 of Tax Code of RF under which the following tax rates are established:

1. For income obtained as dividends:

- for RF tax resident individuals – 9%;*
- for RF tax non-resident individuals - 15%.*

2. For other income from securities dealing:

- for RF tax resident individuals - 13%;*
- for RF tax non-resident individuals - 30%.*

Taxation of juridical persons (both Russia's entities and foreign entities conducting their activities in the Russian Federation through permanent representations and/or obtaining revenues from sources in the Russian Federation).

Under Clause 1 and Clause 19 of Article 250 of the Tax Code of the Russian Federation, income from business interest in other organizations, to the exclusion of the income applied to pay for additional shares (business interests) distributed among the shareholders (members) of the organization, and revenues obtained from operations with financial instruments of futures contracts are deemed non-operating revenues subject to taxation. In this, the date of receipt of the revenue is the date of the money arriving at the taxpayer's banking account / cashiers'.

The specifics of determining the taxable base for revenues from shared participation in other entities (dividends) are set up by Art.275 of the RF Tax Code.

When the revenue source is the Russia's entity, this entity will be held a tax agent and will determine the tax amount. In this, the tax amount to be deducted from the revenue of the recipient of dividends will be calculated by the tax agent proceeding from the total tax amount and the share of each taxpayer in the sum total of the dividends. The total tax amount will be determined as a product of the tax rate of 9% (Art.284 of the RF Tax Code) by the difference between the sum total of dividends to be distributed among the stockholders / participants in the current tax period, minus the sum total of dividends to be paid by the tax agent to a foreign entity and/or physical person – non-resident of RF in the current tax period, and the sum total of dividends obtained by the tax agent himself in the current reporting (tax) period. If this difference is negative, the tax payment obligation will not arise, and no reimbursement from the budget will be due.

When the Russia's entity – the tax agent - pays dividends to a foreign entity, the taxable base of the taxpayer – the recipient of the dividends will be determined for every such payment as a sum total of the paid dividends, and the rate established, accordingly, by Article 284(3)(3) (15%) will be applied to it.

The calculation and deduction of the sum total of the tax on the revenues paid to foreign entities will be done by the tax agent on all kinds of revenues listed in Item 1, Art.309 of the RF Tax Code in all cases of payment of such revenues, except in the following cases:

(1) when the tax agent has been notified by the recipient of the revenue that the revenue being paid is related to the permanent representation of the recipient of the revenue in the Russian Federation, and the tax agent has in his possession a duly notarized copy of a certificate that the revenue recipient has been registered with the tax authorities, documented not earlier than in the preceding tax period;

(2) when Article 284 of this Code establishes zero tax rate for the income payable by a foreign organization;

3) in the case of payment of revenues which, according to international agreements / understandings, are not to be taxable in the Russian Federation, provided that the foreign entity present to the tax agent a confirmation as per Item 1, Art.312 of the RF Tax Code;

(4) when the tax agent pays to the foreign entity revenues which, in accordance with international agreements / understandings will be taxable in the Russian Federation at reduced rates, and the tax agent will deduct the tax amount from the revenues at the corresponding reduced rates, provided the foreign entity furnishes to the tax agent a proof of this foreign entity having permanent residence in the state with whom the Russian Federation has an international agreement / understanding regulating the issues of taxation, certified by a competent authority of the foreign state in question. When the proof thus furnished is in a foreign language, its Russian translation will also be furnished to the tax agent.

The specifics of determining the taxable base for operations with securities are set out in Art.280 of the RF Tax Code.

Revenues of a taxpayer from operations of sale or other disposal of securities (including retirement) will be determined proceeding from the price of sale or other disposal of the security, and from the amount of the accrued interest / coupon yield paid by the buyer to the taxpayer, and from the amount of the accrued interest / coupon yield paid to the taxpayer by the Issuer. In this, the amounts of interest / coupon yield previously accounted for in taxation will not be included into the taxable revenue.

Expenses on sale / other disposal of securities including investment units of a mutual investment fund, will be determined proceeding from the purchase price of the security (including its purchase cost), the expenses on its sale, the amount of discounts on the estimated cost of investment units, and the amount of accrued interest / coupon yield paid by the taxpayer to the seller of the security. In this, the amounts of interest / coupon yield previously accounted for in taxation will not be included into the taxable revenue.

The actual price of sale or other disposal of securities within the range between the maximum and minimum prices of transactions with the security in question, registered by the manager of trade on the securities market on the date of the transaction in question will be held as the market price for the taxation purposes. In the event of sale of securities in circulation on the securities market at a price below the minimum price of transactions on the managed securities market, the minimum price of such transaction on the managed securities market will be taken to arrive at the financial outcome.

As concerns securities not in circulation on a managed securities market, taken for the taxation purposes will be the actual price of sale or other disposal of the securities in question if at least one of the following conditions applies:

- if the actual price of the transaction in question is within the range of prices of the similar security registered by the manager of trade on the securities market on the date of the transaction in question, provided that trade with these securities took place at the manager of trade at least once within the 12 past months;

- if the deviation of the actual price of the transaction in question is within 20% plus or minus of the average weighted price of the similar (identical, homogeneous) security as calculated by the manager of trade on the securities market proceeding from his rules for the results of trade on the date of execution of this transaction or on the date of the nearest trade before the date of execution of the transaction in question, when trade with these securities took place at the manager of trade at least once during the last 12 months.

In the event of unavailability of information on the results of trade with the similar/identical securities, the actual price of the transaction will be taken for the purposes of taxation if this price does not differ by more than 20 percent from the calculation price of this security which can be determined on the date of execution of the transaction with this security, accounting for the actual conditions of the executed transaction, the specifics of circulation and the price of the security, and other indices on which the information can serve as the grounds for such calculation. To determine the calculation price of a share of stock by the taxpayer either by himself or with an appraiser engaged, there should be used the methods of value assessment stipulated by the laws of the Russian

Federation, and for determining the calculation price of a debt security can be used the refinancing rate of the Central Bank of the Russian Federation. When the taxpayer determines the calculation price of a share of stock by himself, the method used for the value assessment must be specified in the taxpayer's accounting policy.

The taxable base for operations with securities will be determined by the taxpayer separately. In this, the taxable base for operations with securities in circulation on a managed securities market will be determined separately from the taxable base for operations with securities not in circulation on a managed securities market.

In selling or otherwise disposing of securities, the taxpayer will, proceeding from the accounting policy adopted for the taxation purposes, deduce for the expenses the value of the securities disposed of:

- *proceeding from the unit value.*

Taxpayers who have suffered losses from operations with securities in the previous tax period or in previous tax periods may reduce accordingly the taxable base calculated for operations with securities in the reporting (tax) period. In this, losses from operations with securities not in circulation on a managed securities market suffered in the previous tax period can be used to reduce the taxable base of operations with such securities determined in the reporting (tax) period. Losses from operations with securities in circulation on a managed securities market suffered in the previous tax period can be used to reduce the taxable base of operations of sale of this category of securities.

Revenues obtained from operations with securities in circulation on a managed securities market may not be reduced by either expenses on or losses from operations with securities not in circulation on a managed securities market. Revenues obtained from operations with securities not in circulation on a managed securities market may not be reduced by either expenses on or losses from operations with securities in circulation on a managed securities market.

By the results of every accounting (tax) period, taxpayers shall calculate the advance payment amount based on the tax rate of 24% and the taxable revenue calculated on an accrual basis from the beginning of the tax period till the end of the reporting (tax) period. Throughout the reporting period, taxpayers will calculate the amount of the monthly advance payment due.

When the taxpayer is a foreign entity receiving revenues from sources in the Russian Federation not related to their permanent representation, the obligation of determining the amount of the tax due at the rate of 20%, deduction of this amount from the taxpayer's revenues and transferring the tax to the budget will be borne by the Russia's entity paying this revenue to the taxpayer. The tax agent will determine the amount of tax due on every payment / transfer of the money, or other delivery of the revenue. When the source of revenues of a taxpayer in the form of dividends is the Russia's entity, the obligation of deduction of the tax from the taxpayer's revenues and transferring the tax to the budget will be borne by this source of revenues. On revenues paid to taxpayers as dividends, the tax deducted in the payment of the revenue will be transferred to the budget by the tax agent making the payment within 10 days from the payment date.
